

Table of contents of Automatica issue 44:6 (June, 2008)

Authors	Title
Special issue papers	
Alain Haurie and Roland Malhamé	Editorial
Arie Leizarowitz	Turnpike properties of a class of aquifer control problems
Lukasz Balbus and Andrzej S. Nowak	Existence of perfect equilibria in a class of multigenerational stochastic games of capital accumulation
Arie Leizarowitz and Adam Shwartz	Exact finite approximations of average-cost countable Markov decision processes
Carlo Carraro and Alessandra Sgobbi	Modelling negotiated decision making in environmental and natural resource management
Hans M. Amman, David A. Kendrick, and Marco P. Tucci	Solving the Beck and Wieland model with optimal experimentation in <i>DualPC</i>
Hanqin Zhang and Qing Zhang	Trading a mean-reverting asset: Buy low and sell high
André de Palma and Jean-Luc Prigent	Hedging global environment risks: An option based portfolio insurance
David W. K. Yeung and Leon Petrosyan	A cooperative stochastic differential game of transboundary industrial pollution
O. Bahn, A. Haurie and R. Malhamé	A stochastic control model for optimal timing of climate policies
Yu. Nesterov and J.-Ph. Vial	Confidence level solutions for stochastic programming
Julien Thénié and Jean-Philippe Vial	Step decision rules for multistage stochastic programming: A heuristic approach
Kristian Nolde, Markus Uhr, and Manfred Morari	Medium term scheduling of a hydro-thermal system using stochastic model predictive control
Andrea Castelletti, Francesca Pianosi, and Rodolfo Soncini-Sessa	Water reservoir control under economic, social and environmental constraints
Pedro Linares, Francisco Javier Santos, Mariano Ventosa, and Luis Lapiedra	Incorporating oligopoly, CO ₂ emissions trading and green certificates into a power generation expansion model
Alexandra Grancharova, Juš Kocijan, and Tor Arne Johansen	Explicit stochastic predictive control of combustion plants based on Gaussian process models
Claudio Carnevale, Enrico Pisoni, and Marialuisa Volta	A multi-objective nonlinear optimization approach to design effective air quality control policies
Jeffrey D. Azzato and Jacek B. Krawczyk	Applying a finite-horizon numerical optimization method to a periodic optimal control problem
